OBJECTIVE

Full-Stack Developer with 8+ years of experience in **PHP frameworks** (Laravel, CodeIgniter, WordPress), skilled in both frontend and backend development. Currently learning **Python** and exploring **Artificial Intelligence**, including **Generative AI**, **Large Language Models (LLMs)**, and **OpenAI GPT API** integrations, as well as workflow automation using **Jupyter** and the **OpenAI SDK**.

EDUCATION

Bachelor of Engineering, Computer Engineering Jun 2006 – Jun 2010
NRIIST 6.3/10

WORK EXPERIENCE

Contract PHP Developer, THINQOR SOLUTIONS PVT. LTD Apr 2025 – Jul 2025

- Developed and maintained **Laravel backend modules** for policy management, claim handling, and quotation workflows.
- Integrated **Vue.js components** for dynamic features like quote calculators, FAQs, and customer forms.
- Customized **WordPress CMS** to manage blogs and static pages.
- Improved **website performance and SEO**, ensuring a responsive and mobile-first design.
- Collaborated with cross-functional teams for **API integration, bug fixing, and deployment**.
- Project Link:**<https://www.travelinsuranz.com.au/>

Full Stack PHP Developer, Aanseaa Technologies Aug 2023 – Nov 2024

- Developed a high-performance web application** using **PHP 8.2, Laravel 11, and SQL Server**, ensuring a **scalable and secure backend architecture**.
- Designed and optimized responsive UIs** with **Bootstrap & React**, achieving **cross-device compatibility** (desktop, tablet, mobile) and improved accessibility standards (WCAG).
- Integrated multiple third-party RESTful APIs** with a **modular, reusable service layer**, enhancing functionality and reducing development time for future features.
- Implemented CI/CD-ready Git workflows**, including **branching strategies, code reviews, and pull requests**, fostering team collaboration and clean code practices.
- Deployed and maintained application on Microsoft Azure**, ensuring **99.9% uptime** and efficient resource utilization.
- Live Project:**<https://finderec.azurewebsites.net/>

PHP Developer , Right Avenue Enterprises (worked for TCS on projects) Jul 2022 – Jul 2023

- Honeywell Project:**
- Contributed to core modules** like **Digital Tier System** and **Unified Access Management** using **Laravel (PHP)**, ensuring a **scalable and maintainable architecture**.
- Managed application deployments on AWS**, including **committing code changes, pushing updates, and ensuring smooth release cycles**.
- Handled SQL data operations via PuTTY** and **uploaded processed data to the SAP portal**, enabling **seamless data integration and reporting**.
- Enhanced software quality** by expanding **unit test coverage** and performing **cross-browser testing**, ensuring stable and consistent releases.
- Collaborated in Agile sprints**, actively engaging in **sprint planning, backlog grooming, and client-facing demos**, aligning deliverables with client expectations.

Wordpress Developer, Peoples University Aug 2018 – Jun 2022

- Built and customized **WordPress** websites with responsive design and optimized performance using **PHP** and **MySQL**.
- Handled **on-page SEO** (meta tags, internal linking, schema) and improved site speed using **GTMetrix, SEMrush, and PageSpeed Insights**.
- Executed **off-page SEO** (backlinks, directory submissions) and managed **digital marketing campaigns** to boost traffic and engagement.
- Project Link:**<https://www.peoplesuniversity.edu.in/>

PHP Developer, MP Online Limited Jan 2018 – Jul 2018

- Built tourism web applications using **PHP** and **CodeIgniter**.
- Led project analysis and backend development, and provided ongoing support.
- Link:**<https://www.mptourism.com/>

JR.PHP Programmer, AEGLE MEDITECH LLP Jul 2016 – Jun 2017

- Developed pharmacy and patient modules using **CodeIgniter**.
- Delivered scalable modules aligned with design specs and UX guidelines.
